## Powerline Data Logger

Client:

In-house development.

### **Requirement:**

To measure various power parameters and log them. User should be able to generate the various reports for documentations as well as for MIS function

### **Solution:**

Embin Developed a data logger for logging various power parameters and generate various reports. The window based application software developed in VC++ communicates with the Data logger using RS232 wired link or using GPRS connectivity.

### **Tools/Platforms:**

- » 8 bit Microcontroller
- » SIM300 GSM/GPRS Modem
- » Firmware: C
- » Application: VC++ 6.0
